Executive Summary

Engineering executive with 20+ years of experience leading Site Reliability Engineering, Cloud Infrastructure, and Platform Engineering organizations supporting enterprise SaaS platforms. Proven success modernizing reliability through observability, automation, incident management, cloud architecture, and high-performing engineering teams.

Executive Highlights

- Built and scaled enterprise Site Reliability Engineering organizations.
- Led cloud modernization and multi-region reliability initiatives.
- Established enterprise SLO, SLI, error budget, observability, and incident management programs.
- Improved engineering velocity through self-service platforms and automation.
- Speaker at DEF CON Cloud Village and DevOpsDays Seattle.
- Adjunct Lecturer, Boise State University.

Core Expertise

Site Reliability Engineering • Platform Engineering • Cloud Infrastructure • Incident Management • Disaster Recovery • Observability • Reliability Strategy • Engineering Leadership • Google Cloud • Azure • AWS • Kubernetes • Terraform • Datadog • AI Strategy • Developer Experience

Professional Experience

Global Payments / TouchNet

Engineering Manager – Site Reliability Engineering & Cloud Infrastructure | 2024–Present

- Transformed production architecture from single-region infrastructure toward resilient multi-region cloud deployment.
- Established enterprise observability using Datadog, Google Cloud Operations Suite, synthetic monitoring, and self-service monitoring.
- Built self-service deployment and monitoring capabilities reducing operational toil and accelerating engineering delivery.
- Defined service ownership, SLOs, SLIs, operational readiness reviews, and reliability standards.
- Expanded SRE ownership across cloud infrastructure, disaster recovery, governance, and production reliability.

Kohl's

Senior Manager, Site Reliability Engineering | 2021–2023

- Operationalized SLOs and SLIs across approximately 90% of the product portfolio.
- Reduced MTTD and MTTR by more than 50%.

- Built a blameless incident management culture.

IBM (Taos)

Principal Engineer & Practice Lead, DevOps Now™ | 2019–2021

- Grew consulting practice revenue from \$100K/month to \$322K/month.
- Led enterprise cloud transformation engagements.
- Managed hiring, mentoring, and engineering delivery.

Micron Technology

Cloud Enterprise Architect | 2018–2019

- Reduced cloud approval timelines from 12 months to under two weeks.
- Established enterprise cloud governance accelerating adoption.

HP Inc.

Cloud Automation & Operations Engineering Team Lead | 2014–2018

- Led cloud automation and operations initiatives.
- Advanced DevOps and SRE practices across engineering organizations.

Speaking & Industry Leadership

- Speaker — DEF CON 27 Cloud Village (2019): Security Battle Wounds from a Cloud SRE
- Speaker — DevOpsDays Seattle
- Adjunct Lecturer — Boise State University

Education & Executive Development

• University of California, Berkeley Executive Education
Chief Technology Officer (CTO) Program Certificate, 2026

• University of Wisconsin–Milwaukee
Master of Science, Computer Science

• University of Wisconsin–Milwaukee
Bachelor of Science, Computer Science

Certifications

- 11 Scrum Alliance & Scrum.org certifications spanning leadership, facilitation, coaching, and product ownership.
- Google Cloud: Site Reliability Engineering – Managing and Monitoring Reliability
- Women in Leadership — eCornell
